INAUGURATES ADVANCED COURSE FOR TEXTILE ENGINEERS

In accordance with a circular letter of the Minister of Light Industry, an advanced training course for textile engineers will be begun in the fall of 1951. The course, which will be supervised by the Advanced Engineering Training Institute, will consist of weekly lectures and seminars conducted by the best experts of the textile industry and by faculty members of the Technical University.

Instruction will be given in applied mathematics, organization and planning, spinning (yarn, wool and fiber), weaving (yarn, wool), knitting, dyeing, and processing (yarn, wool).

The course may be attended by graduates of the technical university as well as of the science departments of the university. Graduates of engineering evening courses in 1950 are also eligible to attend, while 1951 graduates will be admitted later, after acquiring some engineering experience.

Competent technicians, as well as graduates of technical and industrial schools, are also eligible to attend. The 1951 graduates are excluded.

At present, the advanced training course is open only for engineers employed in Budapest. Later, probably in 1952, a correspondence course will be available for engineers stationed outside of Budapest.

Registration for the course is voluntary. An adequate recruiting campaign must be conducted to convince the majority of the engineers of the usefulness of the advanced course.
